DEPARTMENT OF AGRICULTURE, BENGAL.

Forecast of the Winter *till* (Sesamum) crop of Bengal, 1927-28.

(NOTE.—On an average of the five years ending 1925-26, the area under *til* in Bengal has represented some 2·8 per cent. of the total area under *til* in British India.)

Character of the season.—The weather at the outset and during the early period of growth was generally favourable excepting in some West and North Bengal districts, where a less area was sown owing to scanty rainfall. Excessive rainfall in September in Mymensingh and late subsidence of flood-water in Dacca and Tippera also somewhat retarded the cultivation of the crop in these districts and less *til* was sown this year in consequence. Lack of adequate soil-moisture owing to continued drought at the time of maturity adversely affected the outturn notably in the districts of Nadia, Jessore, Birbhum, Dinajpur and Malda. Elsewhere the outturn is expected to be fairly satisfactory.

Acreage.—The total area sown with the crop this year is estimated at 50,700 acres against 52,900 acres last year.

Outturn.—According to District Officers' estimates, the outturn of the crop for the province as a whole works out at 83 per cent. of the normal, against 92 per cent. last year. Taking 6 maunds as a normal rate of yield per acre, the gross outturn for the province is estimated at 9,300 tons this year against 10,900 tons last year, or a decrease of about 15 per cent.

ROBERT S. FINLOW,
Director of Agriculture, Bengal.

BENGAL.

5. Tuni Meerza, Superintendent of Police.	This officer joined the Police Department in 1899 and was promoted to the Indian Police Service in July 1917. He was Superintendent of Police at Pabna when there was an outbreak of communal disturbances in that district in July 1926. He was faced with a very serious situation, particularly during the first two days of the trouble before reinforcements could reach him, as he had to keep in check a large and excited populace with only a small police force at his disposal. He and his men were on duty continuously for more than 48 hours. He handled the situation admirably, and throughout laboured indefatigably in bringing it under control. He displayed qualities of leadership and organisation of a very high order, coolness, energy and tact, and it was largely due to his personal efforts that the trouble did not spread to surrounding districts.

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

No. 18L., dated Calcutta, the 5th January, 1928.—The following Bill introduced in the Bengal Legislative Council on the 14th December, 1927, on the motion of Rai Harendranath Chaudhuri is hereby published for general information together with the Statement of Objects and Reasons annexed thereto :—

THE BENGAL VILLAGE SELF-GOVERNMENT (AMENDMENT) BILL, 1927.

A

BILL

to amend the Bengal Village Self-Government Act, 1919.

Preamble. WHEREAS it is expedient to amend the Bengal Village Self-Government Act, 1919, in the manner hereinafter appearing;

It is hereby enacted as follows :—

Short title. **1.** This Act may be called the Bengal Village Self-Government (Amendment) Act, 1927.

New section substituted for section 20 of Bengal Act V of 1919.

2. For section 20 of the Bengal Village Self-Government Act, 1919 (hereinafter referred to as the said Act), the following shall be substituted, namely:

Appointment of dafadars and chaukidars.

"**20.** (*1*) The union board shall, when a vacancy exists, appoint a person to be a dafadar or a chaukidar:

(*2*) The union board may dismiss any dafadar or chaukidar and the District Magistrate may dismiss any dafadar or chaukidar who has failed to exercise the powers or to perform the duties referred to in section 23:

Provided that when making an order dismissing a dafadar or a chaukidar the District Magistrate shall consider the views of the union board and shall record his reasons in writing.

(*3*) Notwithstanding anything contained in sub-section (*1*) any dafadar or chaukidar already employed in any union existing at the commencement of the Bengal Village Self-Government (Amendment) Act, 1927, shall be deemed to have been appointed under this Act."

New section substituted for section 21 (*1*) of Bengal Act V of 1919.

3. In section 21 of the said Act—

For sub-section (*1*) the following shall be substituted, namely:—

"(*1*) The number of dafadars and chaukidars to be employed in a union, the salary to be paid to them, and the nature and the cost of the equipment shall be determined from time to time by the union board:

Notwithstanding anything contained in this sub-section, the number of dafadars and chaukidars employed in a union, the salary to be paid to them and the cost of their equipment shall continue to be the same as on the day on which the Bengal Village Self-Government (Amendment) Act, 1927, comes into operation until altered under the provisions of this sub-section."

STATEMENT OF OBJECTS AND REASONS.

One of the primary functions of union boards is to provide for the maintenance of the village watch. They have to raise by taxation adequate funds for it and to pay regularly the salaries and the cost of equipment of the village chaukidars. It is therefore only proper that they should have full control over the dafadars and chaukidars. It is also expedient and necessary in the interest of the efficiency of the village police that they should be under as little dual control as possible. Well-informed persons are aware that the legal provisions regarding the control of the village watch have been changed from time to time and have more than once been the subject of separate amendment. No apology is therefore required for such a short amending Bill. Further it is widely felt that the union boards, if they are to be real institutions of local self-government, should have full control over their servants; at any rate the village authorities should have no less powers than they enjoyed under the old Act of 1870.

CALCUTTA, THE 17TH DECEMBER, 1927.

RESOLUTION—No. 6636 Vety.

Minister-in-charge: The Hon'ble Sir P. C. Mitter, Kt., C.I.E.

READ—

Annual Reports of the Civil Veterinary Department, Bengal, and of the Bengal Veterinary College, for the year 1926-27.

I.—Civil Veterinary Department.

Mr. P. J. Kerr held charge of the office of the Director of Civil Veterinary Department and Veterinary Adviser to Government throughout the year. Rai Sahib Sharat Chandra Pal was Assistant Director in charge of the Western Range throughout the year, except

for 2 months' leave, and Babu Nripendra Nath Mazumdar was Assistant Director in charge of the Eastern Range throughout the year.

2. There has been no noticeable change in the administrative arrangements generally during the year under review, but Government have had under consideration a number of important schemes submitted by the Veterinary Adviser. Administrative approval has been given to his proposal to supply local bodies with free serum for inoculation against epidemic diseases. Whilst inoculation, if promptly and universally applied, affords a practically certain method of stamping out epidemic disease, the difficulty felt by local bodies in meeting, and their consequent reluctance to incur, the heavy expense on account of the purchase of preventive serum, has made it difficult for the Veterinary Department to deal with these outbreaks satisfactorily in the past. Consequently, while adhering to the view that the ordinary care of animals is a matter which properly appertains to local bodies, Government decided to treat the combating of epidemic disease on provincial lines. Administrative approval has similarly been given to the employment of 9 extra staff Veterinary Assistant Surgeons for epidemic and propaganda work: and to the appointment of an officer of the rank of Inspector to carry out propaganda on the subject of the prevention of diseases, etc. It is hoped that funds will be provided for these purposes in next year's budget.

A valuable scheme for thana dispensaries to be administered by groups of Union Boards was drawn up in consultation with, and with the concurrence of, those bodies by the Collector of Faridpur, Mr. L. B. Burrows, and was submitted to Government by the Veterinary Adviser. The scheme was approved by Government but the wording of the Village Self-Government Act as it now stands prevents the fulfilment of the scheme in practice. The amendment of the Act is under consideration.

3. The total number of deaths of animals due to epidemic disease was 35,719 as compared with 33,224 in the previous year. The Director attributes this not so much to any actual increase in the prevalence of disease as to a better system of intelligence. Rinderpest with 33,405 deaths accounted for over 93 per cent. of the casualties, while 1,492 beasts died of hæmorrhagic septicæmia, 464 of these being in the district of Midnapore. Khulna and Bakarganj had over 4,400 deaths each from rinderpest, Chittagong running them close with 3,239. It is noticeable that the Sodepur Pinjrapole had 193 deaths from contagious diseases, a total which exceeded that of either Cooch Behar, Darjeeling, Bogra, Hooghly or Howrah. This, however, is an immense improvement on the two previous years when 1,742 and 865 inmates of this institution succumbed.

The Hon'ble Minister is glad to observe that there has been an appreciable increase in the number of cattle inoculated, *viz.*, 206,616 as against 173,762 in the previous year, but there are 25½ million cattle in Bengal and an inoculation rate of less than 1 per cent. can only mean that there is a long way to go before it can be said that the Department has obtained control of epidemic disease. Government will watch with interest when these schemes come into operation the effect of the free supply of serum and of the increased staff, referred to in paragraph 2 above.

The usual work of the Veterinary Assistant Surgeons was carried on, and 126,661 cases were treated as against 100,830 in the previous year. The staff of reserve Veterinary Assistant Surgeons was increased by 4.

Two new dispensaries, one at Kharagpur and one at Tangail, were opened during the year and there were 4 more Veterinary Assistant Surgeons employed by local bodies than in the previous year. There was again an increase in the number of cases treated at dispensaries, *viz.*, 56,184 as against 51,025 or nearly 10 per cent., which is much the same rate as the previous year showed in respect of its predecessor, and a proof that the services of the Department are appreciated. It is satisfactory to observe that the District Board of Faridpur have provided funds for the construction of serum cellar.

The Department took its share in that successful enterprise of the Eastern Bengal Railway, the Demonstration Train, and the Veterinary Adviser reports favourably on its results.

4. His Excellency acting with the Minister-in-charge notices with pleasure the names of officers of the Department who did good work during the year and desires to acknowledge also the efficient way in which Mr. Kerr discharged his duties.

II.—Bengal Veterinary College.

5. Mr. A. D. MacGregor held charge as Principal; Mr. R. T. Davis as Vice-Principal, and Rai Sahib Dibakar De as Assistant Principal throughout the year. Towards the close of the year Government issued orders placing the College directly under Government instead of being, as hitherto, under the control of the Veterinary Adviser.

6. There was an increase in the number of students attending the College, the number at the close of the session being 125 as against 100 in the previous year. At the beginning of the present session there were 168 students, but a certain number always fall out during the course of the year. The increase is probably due almost entirely to the decision of Government to reintroduce the Government stipends for Bengal students. These were discontinued in accordance with a recommendation of the Retrenchment Committee with effect from May, 1923, and were followed by an immediate drop in the number of Bengal students in the two succeeding years. They have been re-introduced with effect from the current session. The remark of the Board of Examiners in respect of the annual examination held in February-March, 1927, that the results were highly satisfactory in classes A and B and fairly satisfactory in class C reflects credit on the teaching staff. The teaching staff was strengthened by a new appointment of Assistant Lecturer in the Inspector grade.

7. The number of patients treated and operations performed showed little variation, *viz.*, 2,562 and 374, respectively, as compared with 2,587 and 296 in the previous year.

Valuable work was as usual carried out at the Raymond Research Laboratory, in examination of pathological specimens of brains for rabies and so on.

8. During the year under report the Committee of Management of the College which had been more or less in abeyance for many years was reconstituted and its duties defined.

9. His Excellency acting with the Minister-in-charge notices with pleasure the names of those of his staff mentioned by the Principal for good work during the year and desires to acknowledge the care and attention which Mr. MacGregor has devoted to the administration of the College.

10. The Minister would conclude this resolution by stating that he has to discharge the duty of reviewing the administration of a year in the policy or supervision of which he had no hand and so naturally he had to proceed on records as he found them. The difficulties of his delicate task have been further enhanced by the fact that he had to undertake this duty even before he had a reasonable time to shape his own policy.

By order of the Government (Ministry of Agriculture),

R. N. REID,
Secretary to the Government of Bengal.

Ben. Act III of 1884

STATEMENT OF OBJECTS AND REASONS.

Objects and reasons as regards the Cossipur-Chitpur area.

The Calcutta Municipal Act, 1923, as it was originally framed, did not include in its local extent the Cossipur-Chitpur area, and the Bill even when it emerged from the Select Committee did not include that area. This area was amalgamated with Calcutta in the teeth of vehement opposition by the rate-payers and against the deliberate and considered recommendations and opinions to the contrary made and given by the Amalgamation Commission appointed by Government, the then District Magistrate of 24-Parganas, and the Commissioners of the old Cossipur-Chitpur Municipality. The motion for amalgamation was carried by a very narrow majority in the Bengal Legislative Council, even the Hon'ble Minister in charge of the Bill voting against the same. It was generally thought that the step of increasing the liabilities and obligations of the Corporation of Calcutta by adding to the already extensive city the aforesaid vast area of Cossipur-Chitpur, covering more than four square miles and comprising many mills, factories and business houses, was a menace to the health and population of the city. Even before the amalgamation of that area, the Corporation of Calcutta was not in a position to meet its statutory obligations as regards the city proper in a satisfactory way. And this has been much more the case after the amalgamation, as it was bound to be, both in respect of the city proper and the said added area; and the position has been rendered worse on account of the financial difficulties of the Corporation. For this reason, many good schemes have either been abandoned or postponed, and there is very little hope of the said schemes being ever carried out if the aforesaid vast area is any longer kept within the limits of the Corporation of Calcutta. On the other hand, the people of the said added area, will not certainly for many years to come enjoy the amenities which are now being enjoyed by the residents of the city though the former have been called upon to pay rates and taxes many times more than their former assessment, ignoring the salutary provision made by the Legislature for levying a lower and progressive rate under section 7 of the Calcutta Municipal (No. II) Act, 1923, thus causing much dissatisfaction amongst the rate-payers of that area, notwithstanding the partial reduction of valuation of holdings made in some cases by the Chief Executive Officer in the exercise of his powers under section 146 of the Calcutta Municipal Act, 1923. Moreover, the administration by the Corporation of Calcutta is costlier than that by the old Municipality, which was commended in successive Government annual reports, and under which the people enjoyed many privileges and facilities of which they have now been deprived. In fact, there was no case made out for amalgamating the said area with Calcutta by abolishing a flourishing and popular Municipality which effected considerable improvements in every direction within the said area, and had a combined surface drainage and sewerage scheme and other important schemes ready for being taken up, though it derived a much lower income by taxation under the system provided for in the Bengal Municipal Act, 1884.

Objects and reasons as regards the Garden Reach area.

Most of the above reasons also apply to the case of the Garden Reach area, which comprises nearly 4½ square miles and is mostly undeveloped and consists extensively of jungles, ditches, tanks and paddy lands, without lights, filtered water, roads or drains. Most

of the inhabitants of this area are very poor and they can ill afford to pay the exorbitant taxes imposed upon them by the Corporation of Calcutta, as a result of which their goods have been seized under distress warrants and many of them have been rendered homeless. Owing to their inability to pay taxes, almost all the inhabitants have been disenfranchised: where there were nearly 600 Muhammadan electors before, there were less than 50 at the last General Election.

Similar Bill passed by the last Council.

It will be remembered that a Bill with the same object as the present one was introduced by Dr. A. Suhrawardy and passed by the Legislative Council on the 18th August, 1926, but the same was not assented to by the then Governor of the Province. But, in his letter to Dr. A. Suhrawardy, His Excellency observed: "It will be always open to the next Council, should they desire to do so, to consider at leisure a fresh Bill with the same object." The present Bill is introduced with necessary amendments and it is hoped that the present Council will extend to it the same sympathy and support as was given by the last Council to Dr. A. Suhrawardy's Bill.

DEPARTMENT OF AGRICULTURE, BENGAL.

First Forecast of the wheat crop of Bengal, 1927-28.

[NOTE.—On an average of the five years ending 1925-26, the area under wheat in Bengal has represented some 0·4 per cent. of the total area under wheat in India. The ratio of the irrigated wheat acreage to total wheat acreage in (*a*) British India and (*b*) in the territory now reported on has, in the five years ending 1925-26, averaged (*a*) 89·0 and (*b*) 11·2 per cent., respectively.]

Explanatory.—Four forecasts of the wheat crop are published. This forecast deals only with the area sown and the general condition of the crop in its early stages.

Acreage.—According to the estimates of the District Officers, the total area sown amounts to 107,100 acres as against 128,700 and 129,300 acres, reported, respectively, in the corresponding and final forecasts of last year.

Character of the season.—The rainfall during the latter part of the monsoon period was sufficient for cultivation and for early sowings, but prolonged drought delayed later sowings and affected the growth of early crops especially in parts of North and West Bengal. The present condition is generally reported to be fair except in Nadia, Murshidabad, Bankura, Rajshahi, Bogra and Malda, where it is poor.

(*2*) When vessels are being towed alongside the side-lights prescribed in Article 2 (*1*) (*b*) and (*c*) shall be carried on the outermost side of the outermost vessel on each side. None of the other vessels shall exhibit side-lights.

(*3*). In cases in which a flat or other vessel is being towed by two steam-vessels lashed alongside on each side they shall have the white masthead light and the red and green side-lights so placed that they will be visible as set forth in Article 2 (*1*), *i.e.*, the white light prescribed in Article 2 (*1*) (*a*) shall be carried on the vessel towed, the green and red lights prescribed by Article 2 (*1*) (*b*) and (*c*) being carried by the steam-vessels lashed to the starboard and port sides respectively of the vessel towed. Such steam-vessels together with the vessel towed by them shall be taken as one vessel for the purpose of this rule.

(*4*).—A steam-vessel when towing other vessels astern shall, in addition to her side-lights, carry two bright white lights in a vertical line one over the other not less than 3 feet apart in the fore part of the vessel. Each of these lights shall be of the same construction and character as the light prescribed in Article 2 (*a*).

Article 4.—All vessels under oars or sails when under way, and all vessels being towed astern shall not be obliged to carry the lights mentioned in Article 2 (*1*) (*b*) and (*c*) but if they do not carry them they shall, in those cases where there is a mast, carry thereon a white light in a lantern so constructed as to show a clear, uniform and unbroken light visible all round, and in those cases where there is no mast, shall show continuously a similar white light from a conspicuous position so as to be visible all round.

Article 5.—A vessel which is being overtaken by another, shall show from her stern to such last mentioned vessel a white light.

Article 6.—Every vessel, when at anchor, or made fast to the shore or to a jetty or landing stage or to another vessel not underway, shall carry where it can best be seen, a white light in a lantern so constructed as to show a clear, uniform and unbroken light visible all round at a distance of at least 1 mile.

A vessel aground in or near a fairway shall carry the above light.

Article 7.—A steam-vessel using the electric search-light shall on meeting another throw the light broadly on that side of the river which she intends to take. When a steam-vessel makes fast to allow another such vessel to pass, the search-light of the stationary vessel shall be either extinguished or be kept broad on the bank until the moving vessel has passed.

Article 8.—Whenever a red cone or red flag is hoisted by a dredger it shall be taken as a warning by other vessels not to pass her as she is engaged in dredging.

Sound Signals for Fog, etc.

Article 9.—All signals prescribed by this article for steam-vessels underway shall be given on the whistle or siren.

The words " prolonged blast " used in these rules shall mean a blast of from 4 to 6 seconds duration.

A steam-vessel shall be provided with an efficient whistle or siren, sounded by steam or some substitute for steam, so placed that the sound may not be intercepted by any obstruction, and also with an efficient bell.

In fog, mist or heavy rain-storms, whether by day or by night, the signals shall be used in the following manner:—

(*a*) A steam-vessel having way upon her shall sound at intervals of not more than two minutes, a prolonged blast.

(*b*) A steam-vessel underway, but stopped and having no way upon her, shall sound at intervals of not more than two minutes two prolonged blasts, with an interval of about one second between them.

(*c*) A steam-vessel, when at anchor, shall at intervals of not more than one minute, ring the bell rapidly for about five seconds.

Speed of Ships to be Moderate in Fog, etc.

Article 10.—(*1*) Every steam-vessel shall, in a fog, mist or heavy rain-storms, proceed at a moderate speed, having careful regard to the existing circumstances and condition.

(*2*) A steam-vessel hearing apparently forward of her beam, the fog signal of any other vessel, the position of which is not ascertained, shall, so far as the circumstances of the case admit, stop her engines, and then navigate with caution until danger or collision is over.

General Warning Signals.

Article 11.—One prolonged blast shall be given to convey a warning in the following cases:—

(*a*) When a steam-vessel approaches her destination.

(*b*) To attract the attention of other vessels, especially native craft.

(*c*) On approaching a bend in the channel.

STEERING AND SAILING RULES.

Preliminary—Risk of Collision.

Every person in charge of a steam-vessel shall, as far as circumstances permit, ascertain the risk of collision by carefully watching the compass bearing of an approaching vessel. If the bearing does not appreciably change, such risk should be deemed to exist.

Article 12.—When two steam-vessels are meeting end on, or nearly end on, so as to involve risk of collision, each shall alter her course to starboard so that each may pass on the port side of the other.

This Article only applies to cases where vessels are meeting end on, or nearly end on, in such manner as to involve risk of collision and does not apply to two vessels which must, if both keep on their respective courses, pass clear of each other.

The only cases to which it does apply are when each of the two vessels is end on, or nearly end on, to the other; and by night, to cases in which each vessel is in such a position as to see both the sidelights of the other.

It does not apply, by day, to cases in which a vessel sees another ahead crossing her own course, or by night to cases where the red light of one vessel is opposed to the red light of the other, or where the green light of one vessel is opposed to the green light of the other, or where a red light without a green light, or a green light without a red light, is seen ahead; or where both green and red lights are seen anywhere but ahead.

Article 13.—When two steam-vessels are crossing, so as to involve risk of collision, the vessel which has the other on her own starboard side shall keep out of the way of the other.

Article 14.—When a steam-vessel and a sailing vessel are proceeding in such directions as to involve risk of collision, the steam-vessel shall keep out of the way of the sailing vessel.

Article 15.—Where by any of these rules one of two vessels is to keep out of the way the other shall keep her course and speed.

Provided that when, in consequence of thick weather or other cause, the vessel which should be given way comes so close that collision cannot be avoided by the action of the giving-way vessel alone, she also shall take such action as will best aid to avert collision.

Article 16.—Every steam-vessel, which is directed by these rules to keep out of the way of another vessel shall, if the circumstances of the case admit, avoid crossing ahead of the other.

Article 17.—Every steam-vessel, which is directed by these rules to keep out of the way of another vessel shall, on approaching her, if necessary, slacken her speed or stop or reverse.

Article 18.—Notwithstanding anything contained in these rules, every steam-vessel overtaking any other shall keep out of the way of the overtaken vessel.

Every steam-vessel coming up with another vessel from any direction than two points abaft her beam, *i.e.*, in such a position with reference to the vessel which she is overtaking that at night she would be unable to see either of that vessel's sidelights, shall be deemed to be an overtaking vessel; and no subsequent alteration of the bearing between the two vessels shall make the overtaking vessel a crossing vessel within the meaning of these rules or relieve her of the duty of keeping clear of the overtaken vessel until she is finally past and clear.

As by day the overtaking vessel cannot always know with certainty whether she is forward of or abaft this direction from the other vessel she should, if in doubt, assume that she is an overtaking vessel and keep out of the way.

Article 19.—In narrow channels every steam-vessel shall, when it is safe and practicable, keep to that side of the fairway or midchannel which lies on the starboard side of such vessel.

Article 20.—In obeying and construing these rules due regard shall be had to all dangers of navigation and collision, and to any special circumstances which may render a departure from the above rules necessary in order to avoid immediate danger.

Article 21.—When steam-vessels going in opposite directions meet in a narrow river with deep bights or when a long spit of sand is formed on a point the steam-vessel going against the tide shall keep under the point giving the bight to the steam-vessel going with the tide.

Article 22.—When two steam-vessels meet in a straight reach of a narrow river the vessel going with the tide shall stop and make fast to allow the vessel going against the tide to proceed past at a very slow speed. If either of the two vessels has flats in tow alongside and it is necessary to cast off a flat or flats the vessel going against the tide shall drop one flat astern and if there is still insufficient room then the vessel that is made fast shall cast off one or more of her flats as may be necessary.

Article 23.—No steam-vessel shall attempt to strive or race against another. When steam-vessels are proceeding in the same direction, but with unequal speed, the vessel which is steaming slowest shall in the narrow reaches of a river offer no obstruction whatever by crossing the channel or otherwise to the free passage of the faster vessel, and shall ease and if necessary stop the engines as soon as the faster vessel comes abreast in order to allow her to pass freely. The master or pilot of the faster vessel if intending to pass, shall intimate such approach by a prolonged blast from his steam whistle. But no vessel shall pass another vessel at any of the turning points or bends of a river, or in a part of the channel so narrow that a third vessel could not with safety pass them.

Article 24.—No steam or motor-vessel shall get under way, either from her anchor or from the river bank, and turn across the river when another vessel is seen approaching from either up or down stream at such a distance that it is doubtful whether the approaching vessel can safely pass her before the turning round or crossing of the river is completed.

Article 25.—When two steam-vessels proceeding in opposite directions are likely to meet at the junction of two rivers, the vessel in the wider of the two streams shall not attempt to enter the narrower river, until the vessel in such latter river has passed out.

Sound Signals for Vessels in Sight of one another.

Article 26.—The words "short blast" used in this rule shall mean a blast of about one second's duration.

Every steam-vessel under way shall, when in sight of any other vessel, in taking any course authorised or required by these rules, indicate that course by the following signals on her whistle or siren, *viz.*:—

One short blast to mean, "I am directing my course to starboard."

Two short blasts to mean, "I am directing my course to port."

Three short blasts to mean, "My engines are going full speed astern."

Proper Precautions to be Taken in all cases.

Article 27.—Nothing in these rules shall exonerate the owner, or master, or crew of any steam-vessel from the consequences of any neglect to carry lights or signals or of any neglect to keep a proper lookout, or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

NOTE.—The practice of conning inland steam-vessels from a position alongside of, or between, flats which obstruct the view, will be considered a breach of this article. Navigation should be controlled from a position which gives a clear view ahead and to two points abaft the beam on either side.

Penalty for Disobedience of the Rules.

Article 28.—Any person committing a breach of any of these rules shall, for each offence, be punished with imprisonment for a term which may extend to six months, or with fine which may extend to five hundred rupees, or with both.

New section 59A.

4. After section 59 of the said Act, the following section shall be inserted, namely:—

District board to have powers of control over committees.

"**59A.** The district board shall have over committees constituted under section 32A all the powers of control given to them by this Act over union boards."

Amendment of section 101.

5. In sub-section (*2*) of section 101 of the said Act,—

(*1*) in clause (*e*) after the word "boards" the words "and of committees of union boards" shall be inserted; and

(*2*) in clause (*j*) for the words "and dispensaries" the words "dispensaries and infirmaries for animals" shall be substituted.

STATEMENT OF OBJECTS AND REASONS.

The Bengal Village Self-Government Act, 1919, as it stands at present, does not authorise Union Boards to combine in order jointly to open dispensaries for human beings or infirmaries for cattle, nor does it authorise Union Boards to spend money on veterinary treatment at all. These are defects which should be remedied without delay in view of the lack of proper facilities for medical and veterinary treatment in rural tracts and of the fact that certain Union Boards are willing to combine in order to provide such facilities. A general power of combining in order to establish and maintain village institutions should be given to Union Boards.

It is therefore proposed—

(*a*) to empower Union Boards to spend money from the Union fund on veterinary work;

(*b*) to empower them to combine with other local authorities to maintain joint dispensaries for men or infirmaries for cattle, and primary schools;

(*c*) to empower them to delegate all or part of their authority to manage particular institutions to committees, which need not be composed exclusively of members of Union Boards, but may include outsiders, *e.g.*, private subscribers; and

(*d*) to confer on the District Board the same authority over the acts of such committees as it possesses over the work of Union Boards.

So far as the provisions of the Bill affect Union Boards, they are permissive and not mandatory; and the Bill may therefore fairly be regarded as non-contentious.

RESOLUTION ON THE SIXTY-FIFTH ANNUAL REPORT OF THE GOVERNMENT CINCHONA PLANTATIONS AND FACTORY IN BENGAL FOR THE YEAR 1926-27.

CALCUTTA, THE 9TH JANUARY, 1928.

RESOLUTION—No. 422.

READ—

The sixty-fifth annual report of the Government Cinchona Plantations and Factory in Bengal for the year 1926-27.

READ ALSO—

The reports of the previous three years.

Mr. C. C. Calder held charge as Superintendent up to the 20th May, 1926. Mr. G. E. Shaw, Government Quinologist, officiated as Superintendent from the 21st May to the 4th July, 1926, when he went on leave, Mr. V. Narayanswami, the then officiating Curator of

the Herbarium of the Royal Botanic Gardens, Calcutta, carried on the current duties of the Superintendent until Dr. J. M. Cowan took over charge on the 12th July. This officer was in charge for the rest of the year.

2. In the Resolution on the Report for the year 1925-26 it was stated that an up-to-date survey of the plantations was urgently needed and that in the mean time very little reliance could be placed on the figures for stock in the profit and loss accounts. Since that resolution was published an officer of the Auditor-General has visited Mungpoo and prepared an elaborate scheme of commercialized accounts for the department. A survey of the plantations has been arranged for in the cold weather of 1927-28 through the agency of the Survey of India, and pending this survey a complete enumeration of all the standing trees has been made. Data have also been collected of the amount of quinine yielded per acre by the various species of cinchona and by trees of different ages.

3. (*a*) Hitherto the records of area have been based on the principle that roughly every 4,000 lbs. of bark harvested is equivalent to the deduction of one acre from the total area planted at various times.

(*b*) This system has for many years been considered the best way of estimating the stock of quinine on the plantations, but it has had the result of giving a misleading idea as to the area under the charge of the Managers and requiring cultivation.

(*c*) The 669,000 lbs. of dry bark which was harvested in the year of report came mainly from thinnings and from dead and drying trees and for several years there has been very little clean felling. Even from the point of view of calculating stock it is possible that the figure of 3,153 acres, given in last year's report as the area under Cinchona, has been unduly reduced by the operation of this system through a course of years.

(*d*) In this year's report, therefore, Mr. Cowan has restored the area which has actually to be cultivated, viz., 4,742 acres. A part of this area is only very sparsely covered with productive trees, but not sufficient to throw any doubt on the conservatism of the estimates of stock arrived at in Appendix A of the Report.

4. The total amount of green bark which could be harvested from the Mungpoo and Munsong plantations at the present moment is estimated at 21,762,500 lbs. of green bark equivalent to 86,05,000 lbs. of dried bark. The value of this bark is at least Rs. 15,80,000 reckoned at the rates which have hitherto been adopted for calculating the value of the plantations according to the average cost of production. In the block account the Mungpoo plantation has been valued at Rs. 8,08,254 and the Munsong plantation at Rs. 18,05,057. The basis of this calculation is 1 anna 5 pies for every unit of quinine in each pound of bark. Owing to the enumeration of the trees the Superintendent has been able to show a considerable increase over last year, but on the other hand he has written down the value of the timber, which is mainly grown as a means of preparing the land for another crop of cinchona and is cut down before it is mature.

5. In this connection it may be mentioned that there is a small plantation of Ipecacuanha at Mungpoo which is ready for harvesting and would realise a large sum at the present market rates.

6. The quantity of dried bark used in the factory during the year was 11,27,519 lbs. of which 5,87,000 lbs. was Bengal bark, the rest Java bark belonging to the Government of India. Altogether 55,136 lbs. of quinine sulphate and febrifuge was manufactured at a cost of Rs. 159 a pound and 19,197 lbs of febrifuge at Re 1-6 per pound, 387 lbs. of other quinine salts at Rs. 3 per pound, and 161 lbs. of other products at Rs. 2 a pound. Even at the reduced rate of Rs. 18 a pound introduced from the beginning of 1926 quinine sulphate therefore gives a profit of Rs. 13½ a pound.

The share of the products of the factory which belongs to the Government of Bengal was 47,731 lbs. of which about two-thirds were sold. Provided the demand continues on the present scale it would appear that the existing supply of bark on the plantations would suffice for the needs of about 24 years. But if India as a whole is to become self dependent, it will be necessary to find new areas for plantation. With this object in view the Forest Department has agreed to an experiment in the reserved forest at Samsing in the

Kalimpong subdivision where 2,000 acres of excellent land are available provided the disadvantages of an excessive rainfall prove to be counterbalanced by the good drainage and other natural advantages. For the first time in the appendices of the Annual Report the value of the stock has been taken as the cost of bark *plus* the cost of manufacture instead of the selling value. This change has resulted in a nominal loss of Rs. 2,57,842 in the profit and loss account.

All the figures and facts compressed with Mr. Cowan's last report give welcome indications that good progress has been made during the year under report and that in the cinchona plantations and the factory the local Government has a very useful and profitable property. The Governor in Council is pleased to record his appreciation of the thoughtful work Mr. Cowan has done for the department during his tenure of office and to thank Mr. Shaw and the other officers who have assisted the Superintendent with the utmost loyalty.

Order.—Ordered that this resolution be published in the *Calcutta Gazette* and that a copy, with a copy of the Report, be submitted to the Government of India.

By order of the Governor in Council,

F. A. SACHSE,

Secretary to the Government of Bengal.

RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON THE LAND REVENUE ADMINISTRATION OF THE PRESIDENCY FOR THE YEAR 1926-27.

GOVERNMENT OF BENGAL.

Revenue Department.

Land Revenue.

CALCUTTA, THE 9TH JANUARY, 1928.

RESOLUTION– NO. 401L R.

READ—

The Report of the Board of Revenue on the Land Revenue Administration of the Presidency for the year 1926-27.

The office of the Member of the Board of Revenue was held by Mr. K. C. De, C.I.E., throughout the year under report.

2. There were several natural calamities during the year of which the cyclone in the Cox's Bazar subdivision of the Chittagong district and the flood in the Contai, Tamluk and the Sadar subdivisions of the district of Midnapore were very severe. Prompt and adequate measures were taken by Government for the relief of the distressed people, and valuable aid was received from the public, both individuals and associations. The weather conditions were not altogether favourable, but the outturn of paddy and jute crops in the province, as a whole, was fair and the prevalent high rates of wages for labour were not affected There was a slight fall in the prices of cloth, but as regards other necessaries of life there was no appreciable variation The rates of interest charged by private money-lenders did not show any tendency to rise. This was partly due to a steady increase in the number of co-operative credit societies.

3. The coal industry suffered from the effects of continued depression of the market, but there was considerable improvement in the prospects of the Kulti and Asansol Iron Works. The other chief industries of the province, namely jute and tea, had a fairly prosperous year His Excellency has read with interest the Board's account of the miscellaneous industries which are going on actively in the mufassail districts of Bengal The list is a long one and covers districts as distant as Noakhali and Bankura, and manufactures as diverse as umbrella handles and mosquito nets and ice. There has been an extension of indigenous electric light and transport companies, and passengers alighting from the train at any country station of importance have learnt to expect a bus or motor-car to take them to their village homes The management of these bus services is entirely local and proves that the motor industry has a big future in Bengal

4 There was no outbreak of serious epidemic diseases although stray cases of cholera, small-pox and malaria occurred here and there all over the Presidency As in previous years the heaviest toll of mortality was due to malaria and kala-azar. Anti-malarial societies and kala-azar centres continued to do good work, and their usefulness is being gradually appreciated.

5 The current demand of land revenue was Rs. 2,91,09,322 and collections were 94 64 per cent. of the total demand. The sale law was administered with moderation, and only 8·3 per cent. of the total defaults was brought to sale

6. The percentage of cost of management of Government estates on the current demand was 10·29 against 9·7 in the previous year. A sum of Rs. 1,99,614 representing 3·7 per cent. of the current demand was spent on agricultural, sanitary and miscellaneous improvements. This is a great

improvement on the previous four years when only an average of Rs. 121,233 was available. The number of schools in Government estates increased from 3,525 to 3,742 and it is satisfactory to note that there was a general increase in the number of pupils.

7. Colonization in the Bakarganj Sunderbans is now in its 20th year and the scheme relating to 22 estates with headquarters at Khepupara is now approaching completion. The total sum advanced up to date by Government is Rs. 13,45,875 of which Rs. 3,10,460 has been spent on establishment and Rs. 9,53,727 on improvements. The total receipts have been Rs. 16,41,040 including Rs. 9,99,659 from rent and Rs. 4,88,537 from forest produce. If the present rules for *salami* had been in force longer, the income would have been much larger. During the year under report 8,648 acres were surveyed and assessment was confirmed of 6 estates with an initial revenue of Rs. 5,843 which will eventually rise to Rs. 33,656.

Provision is being made for a new scheme in the Bhola subdivision where many large areas are available for settlement provided the necessary drinking water tanks are excavated. The total area thus being settled or available for settlement is 35,010 acres, and it is calculated that the expenditure proposed will bring in a *salami* of Rs. 2,20,000 and a final revenue of Rs. 1,22,000.

8. The original colonists have shown a tendency to sell their lands to speculators from outside and the local officers are in favour of the Collector having control of transfers in these areas on the lines of the provisions of Chapter VIIA of the Tenancy Act as in the case of aborginals in Bankura and Birbhum. If an amended Tenancy Act introduces free transferability of raiyati holdings, it is possible that the legislature will be asked to agree to an exception for these areas.

9. The work of colonization is also in progress in the 24-Parganas Sunderbans. About Rs. 23,000 has been spent in the year under report on the construction of embankments and excavation of tanks. The material condition of the colonists is fairly satisfactory. Efforts are being made to meet the persistent demand of the colonists for the expansion of primary education among them. The Central Co-operative Bank and the Arbitration Boards have been doing useful work among the colonists.

10. In the permanently settled area, the relations between landlords and tenants were generally satisfactory. The most common causes of friction, where such existed, were enhancement of rent, exactions of *abwabs*, levy of interest on arrear rents and mismanagement of estates by the agents of the absentee landlords.

11. The special provisions of the Bengal Tenancy Act imposing restrictions on the alienation of land by aboriginals were extended during the year to certain aboriginal tribes in the district of Mymensingh.

12. The thanks of the Governor in Council are due to the Board of Revenue for the efficient administration of the Land Revenue Department, but the tours and inspections of the Board described in the report under review and in the previous report do not compare favourably either in scope or extent with the work of the Board in this respect in some previous years, and the Governor in Council trusts that the Board will be able to arrange to devote more time to this branch of their work in future.

By order of the Governor in Council,

F. A. SACHSE,

Secretary to the Government of Bengal.

DEPARTMENT OF AGRICULTURE, BENGAL.

Monthly Weather and Crop Report of Bengal for December 1927.

I. **Character of the season.**—During the month under review, there was no rainfall throughout the Presidency. The usual rainfall statement is appended.

II. **Progress of agricultural operations.**—Harvesting of winter paddy was progressing under favourable conditions. Preparatory tillage for and sowings of summer paddy seedlings continued, but the operations could not progress satisfactorily owing to drought. Sowings of spring crops were approaching completion. Cutting and pressing of sugarcane continued in Eastern Bengal.

III. **State of standing crops.**—The condition of standing spring crops was generally fair except in parts of West and North Bengal, where it was poor owing to lack of adequate soil moisture.

IV. **Prospects and probable outturn.**—The outturn of winter *til* was estimated at 83 per cent. of the normal. The prospects of sugarcane and cotton were generally fair while those of spring crops were promising except in some West and North Bengal districts, where drought is likely to adversely affect the outturn.

V. **Damage to standing crops.**—Continued drought caused damage to the standing crops in some West and North Bengal districts.

VI. **Condition of agricultural stock.**—The condition of live-stock was, on the whole, fair except for sporadic cases of cattle-disease reported from nine districts.

VII. **Failure of pasturage and fodder.**—Insufficiency of fodder was reported from parts of Nadia and Murshidabad.

VIII. **Prices of food-grains.**—During the second half of the month the price of common rice of the cheapest quality rose in five districts, fell in thirteen and remained stationary in the rest of the Presidency. The prices ranged from 4 seers 10 chitaks per rupee in Rangpur to 7 seers 10 chitaks per rupee in Chittagong.

IX. **Condition of agricultural population.**—The condition of agricultural population was, on the whole, fair except in parts of Nadia, Murshidabad, Birbhum, Bankura, Dinajpur and Malda, where distress prevailed owing to a partial failure of winter rice crop. Test relief works continued in birbhum, Dinajpur and Malda.

For the week ending on the 18th January 1928.

Summary.—Dry weather continued. Harvesting of winter paddy is almost over and that of early spring crops commenced. Field operations for summer paddy continue. Prospects of standing spring crops are generally fair except in parts of West and North Bengal where the condition continues to be reported as poor. Preparatory tillage for jute and other autumn crops is progressing in the East and North Bengal districts. Distress continues to prevail in parts of Bankura, Dinajpur, Nadia, Murshidabad, Birbhum and Malda. In the latter four districts the number of persons employed on test relief works was 1,307, 16,387, 76 and 1,170 respectively. "(*2*) The Council shall have power to inspect any such Medical College or School and may for this purpose appoint a Special Committee of not less than three or more than five members of the Council to inspect any such institution and submit a report in regard thereto, to the Council to enable them to judge of the efficiency of the institution."

Amendment of section 27.

10. In section 27 of the said Act after the word "Council" the words "or any committee of the Council" shall be inserted.

Amendment of section 33.

11. In clause (*a*) of sub-section (*2*) of section 33 of the said Act for the brackets and letter "(*f*)" the brackets and letter "(*j*)" shall be substituted.

STATEMENT OF OBJECTS AND REASONS.

Under section 4 of the Bengal Medical Act, 1914, the Council of Medical Registration consists of the following 15 members:—

(1) A President and 7 members nominated by the Local Government.

(2) One respresentative of the Calcutta University.

(3) Six representatives of different classes of medical practitioners.

It is considered that the time has come to make the Council a more representative body by including members elected by the staffs of the School of Tropical Medicine and of other recognised medical colleges and schools which are already in existence or which may come into existence from time to time. It is also proposed to include a representative of the Railway Board which employs a large number of medical men. As it is not desirable to make the Council too unwieldy, it is proposed to cut down the Government nominees from 7 to 3, and to reduce by one the number of representatives of the graduates and licentiates in medicine or surgery of the Calcutta University. The opportunity has been taken to give the Council specific power to inspect medical institutions, to extend and define the power of the Council, to act through committees for inspection and other purposes, and to authorize the payment of fees for attendance at committee meetings and of travelling allowances for such attendance and for visits of inspection. Other amendments are consequential.

A. N. MOBERLY,
Member-in-charge.

RESOLUTION ON THE ANNUAL PROGRESS REPORT ON THE FOREST ADMINISTRATION IN THE PRESIDENCY OF BENGAL FOR THE YEAR ENDING 31ST MARCH 1927.

CALCUTTA, THE 14TH JANUARY, 1928.

RESOLUTION—No. 626 FOR.

READ—

The Annual Progress Report on the Forest Administration in the Presidency of Bengal for the year ending 31st March, 1927.

READ ALSO—

The reports of the previous three years and the Government resolutions thereon.

Mr. J. Homfray acted as Conservator for 6½ months; during the rest of the year, Mr. Shebbeare held charge. Mr. Shebbeare has prefixed an

interesting foreword to the report illustrated by a chart, showing how the revenue from forests has been steadily increasing. While in 1883-84 the difference between expenditure and revenue was Rs. 3·60 lakhs and in 1917-18 Rs. 7·30 lakhs, since then it has mounted rapidly and in the year under report it was Rs. 14·10 lakhs. The results are very satisfactory, considering that the figures for expenditure include all capital and exceptional expenditure.

The importance of the foreword, however, lies in the explanation given of the present policy of the Department in connection with the improvement of the forests. Owing to the mixture of species of varying qualities and uses, the forests of Bengal in their natural state, as they came under the control of the Forest Department originally, were very uneconomical and difficult to work. Great improvements have resulted from creeper cutting, measures for fire protection, and the like, but even now the forests which contain a large proportion of the most valuable species like *sal* are not worth more than Rs. 1,000 an acre. The standing trees in the mixed forests of Jalpaiguri are not worth more than Rs. 55 an acre, and in the hill forests of Darjeeling and Kurseong they are not worth more than Rs. 320 an acre. The idea of the Forest Department is to clear fell every year 1/80th or 1/40th of each forest according as the trees selected as suitable are slow-growing or fast-growing, and to plant one kind of tree at economical intervals. It is estimated that the plantations which have been made during the last 10 years or so in the northern divisions and in Chittagong will be worth Rs. 7,000 an acre after 80 years in the case of *sal* and *teak* and Rs. 2,360 after 40 years in the case of the faster growing species. The young trees are grown in nurseries and put out in the plantations by the settlers in forest villages, who cultivate their own crops for one or two years in the cleared areas and in return for this concession, free of rent, look after the young trees. The cost works out at Rs. 25 an acre roughly, and this amount with compound interest is recovered from the sale of thinnings during the first 15 or 20 years in the life of the plantation. If this policy can be followed continuously and sufficient labour on the same terms is available, the value of the forests of Bengal will have increased from 7 times to 40 times in the course of the next three generations, even if there is no increase in the present value of the different kinds of forest produce. If the growth of bamboos can be developed on similar lines in the less accessible forests, the increase in value will be even more striking.

Area.—There was no material change in the area of reserved and protected forests during the year. Proposals for modifications in the boundaries of the reserved forest in Chittagong and Khulna were delayed and Government could not accept the original proposals for reservation in the Sundarbans of the 24-Parganas. Including the unclassed and other forests, the total area under the control of the Forest Department was 10,601 square miles.

Natural calamities.—A heavy cyclone passed over the southern portion of the Cox's Bazar subdivision in May, 1926, and for some time disorganised the work in that area. The river Teesta flooded the Chengmari forest and killed some *sal* trees (shorea robusta) in this area. The rivers Mechi, Teesta and Hasimara caused some damage by erosion. The river Sankos has returned to its old bed and the Bholka forest is now safe.

Working plans.—The revised working plans for the Jalpaiguri and Buxa Divisions were under compilation, and the revision of the Kurseong and Sundarbans working plans were taken up in the latter part of the year.

The full programme of regeneration could not be carried out, but 1,994 acres were taken up during the year, against 1,511 in the preceding year.

Utilisation.—The saw mills at Sukna and Toong are working satisfactorily. A band mill was started at Siliguri in April, 1926, and is doing good work. The largest demand of sawn timber was from the Eastern Bengal Railway and also from the tea gardens.

Khedda.—Departmental khedda operations in the Bengal Bhutan Mahal were not very successful and only resulted in a profit of Rs. 2,319. With some departmental help, 59 elephants were caught by contractors in the Chittagong, Chittagong Hill Tracts and the Cox's Bazar Divisions, but 13 of them died.

Outturn: revenue and expenditure.—The steady increase in outturn as well as revenue was maintained. The receipts increased from Rs. 28,56,428 in the previous year to Rs. 31,23,841. The total expenditure was Rs. 17,12,954. This included Rs. 3,22,682 spent on capital outlay, and Rs 6,21,163, spent on conservancy and works. The balance was establishment. The construction of roads and bridges is so necessary for the expansion of the activities of the department that the increased grant which was allowed for this purpose in the year under report was much appreciated by all Forest Officers. The most important road constructed during the year was the Manibhanjang Cart Road in Darjeeling, which is calculated to be of great service to traders from Tibet and to the local people as well as to the Department. Its completion at a reasonable cost in the face of considerable engineering difficulties is a credit to the department. Seventy miles of paths were made in the Chittagong Hill Tracts An aeroplane survey of a portion of the reserved forests in the Chittagong Division was completed during the year at a cost of Rs 50,000

The thanks of the Governor in Council are due to Messrs. Shebbeare and Homfray for their successful administration of the department His Excellency in Council also notices with pleasure the record of good work done by the other officers of the Department referred to in the report

ORDER.—Ordered that the above resolution be published in the *Calcutta Gazette.*

ORDERED ALSO that a copy of the above resolution be forwarded to the Conservator of Forests, Bengal, for information.

CALCUTTA, *the 26th January 1928.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 25th January 1928.

Summary.—During the week light and scattered showers fell over the greater part of the Presidency. Harvesting of winter paddy is over; threshing is going on. Gathering of mustard, *kalai* and other early spring crops and cultivation of summer rice continue favourably. The standing spring crops are doing fairly well except in parts of West and North Bengal, where the condition continues to be reported as poor. The recent rain is likely to improve the prospects. Preparatory tillage for jute and other autumn crops is progressing in Eastern Bengal districts. Distress continues to prevail in parts of Birbhum, Bankura, Dinajpur, Nadia, Murshidabad and Malda. In the latter three districts the number of persons employed on test relief works was 1,158, 12,194, and 1,100, respectively. The average price of common rice for the province has risen by about 0·40 per cent. as compared with that of the previous week.

THE CHARITABLE ENDOWMENTS ACT, 1890.

Minister-in-charge : The Hon'ble Nawab Musharruf Hossain, Khan Bahadur.

No. 448Edn.—The 4th February 1928.—Whereas by a notification No. 1409, dated the 31st March 1896, under the Charitable Endowments Act, 1890, upon the application of Maharaja Bahadur Sir Jotindra Mohan Tagore, K.C.S.I., an Endowment was created of a fund comprising Rs. 15,000 of 3½ per cent. Government Promissory Notes for the maintenance of certain stipends to be awarded to *tol* Pandits for the promotion of Sanskrit learning in accordance with a scheme (hereinafter referred to as the original scheme) particulars hereof were set forth in the second schedule to such notification, and under such scheme the Principal for the time being of the Government Sanskrit College of Calcutta was constituted the administrator of the Fund.

And whereas upon the application (under section 6 of the said Act) and with the concurrence of Dr. Adityanath Mukherjee, M.A., Ph.D., I.E.S., the Principal for the time being of the said Government Sanskrit College of Calcutta, as the person acting in the administration of the trust and also with the concurrence of Maharaja Bahadur Sir Prodyot Kumar Tagore of Tagore Castle, Calcutta (the successor in title of the original Donor) whose wishes as to awarding stipends under the Endowment were directed to be consulted under the original scheme, the Government of Bengal in the Ministry of Education has thought fit to substitute another scheme instead of the said original scheme under the powers in that behalf contained in section 5, sub-section (*2*) of the said Act.

It is hereby notified that the Government of Bengal in the Ministry of Education upon such application and with such concurrence as aforesaid doth hereby order and direct that the scheme particulars whereof are set forth in the first schedule hereunder written shall be substituted for the said original scheme and shall come into operation as from the date of first publication of this notification, and that the securities comprised in the original Endowment of the nominal value of Rs. 15,000 together with the additional securities of the nominal value of Rs. 2,700 purchased out of unexpended income and directed by clause 2 of the substituted scheme to be added to the Fund (particulars of which total securities of the nominal value of Rs. 17,700 are set forth in the second schedule hereunder written) shall thenceforth be vested in the Treasurer of Charitable Endowments for the territories subject to the Government of Bengal to be held by him and his successors (subject to the provisions of the said Act and the rules made thereunder) in trust to apply the same and the income thereof for the maintenance of the said Endowment upon terms of such substituted scheme.

Schedule I.

1. This Endowment shall continue to be called "The Hurro Kumar Tagore *Tol* Stipend" in memory of the Donor's father.

2. Whereas out of unexpended income of the Fund under the original scheme the original administrator purchased 3½ per cent. Government Promissory Notes of the nominal value of Rs. 2,700 with a view to the addition thereof to the capital of the original Fund, such additional Promissory Notes shall no longer be deemed to be income but shall be added to the original Fund making a total nominal Fund of Rs. 17,700 of 3½ per cent. Government Promissory Notes.

3. The Fund shall be administered by the Principal for the time being of the Sanskrit College, Calcutta (hereinafter referred to as "the administrator"), provided always that during any vacancy in the post of Principal of the said College the Director of Public Instruction, Bengal, may exercise any of the powers or duties of the administrator under this scheme.

4. The object of the Endowment is the promotion of Sanskrit learning by means of encouragement and support of teachers of Sanskrit in Bengal by granting stipends to those whose pupils are successful at examinations as hereinafter mentioned, or if any stipends be not awarded to teachers then by granting such unawarded stipends to meritorious students of Sanskrit in the said province as hereinafter mentioned.

5. The income of the Fund amounting to Rs. 619-8 per annum shall be paid when and as it accrues by the Treasurer of Charitable Endowments, Bengal, to the administrator and shall be applied in providing the following stipends :—

Rs.		Rs.	
1 of 3	per mensem	36	per annum.
4 of 4	,,	192	,,
4 of 5	,,	240	,,
2 of 6	,,	144	,,
(11 stipends).		612	,,

The above will leave a surplus of Rs. 7-8 per annum which shall be accumulated and when the accumulated amount reaches the figure Rs. 60, this amount (Rs. 60) shall be applied as an additional stipend of Rs. 5 per mensem for 12 months commencing as soon after such accumulation as may be convenient.

6. Each stipend shall be awarded for twelve months only, such 12 months to begin in such month in each case as the administrator shall decide, but not later than three months after the respective recipient has been finally ascertained in manner hereinafter provided.

7. Recipients of the stipends shall be selected as hereinafter provided, but shall always be subject to the approval and decision of the successor in title of the Maharaja Tagore, provided always that every selection shall be notified to the Maharaja Tagore for the time being as soon as conveniently possible and if not objected to by the Maharaja within three months after being notified to him any selected recipient shall be deemed to be approved and ascertained. If the Maharaja for the time being shall be a minor under the age of 18 years or if his approval cannot be obtained by reason of his ill health, absence or for any other reason the approval shall be given by the Chief Manager for the being of the Tagore Raj or failing him by the Director of Public Instruction, Bengal, for the time being.

8. Recipients of stipends shall be selected from among *adhyapaks* or teachers of such candidates as shall pass the undermentioned examinations, excluding those teachers who obtain any similar stipends granted by the Government of Bengal for encouragement of teachers of Sanskrit. The examinations referred to are those set by the Sanskrit Association, Calcutta, and held or conducted by various Sanskrit Associations recognised under the rules prescribed by resolution of the Government of Bengal, No. 857, dated the 21st March 1892, and notification No. 4236, dated the 29th December 1896, and notification No. 1409, dated the 31st March 1898, or the other rules for the time being in force in connection therewith. Preference shall be given to teachers at those *tols* whose students are examined before the Calcutta Pandit Sabha.

This scheme shall be applicable to both the first and the second examinations set by the Sanskrit Association yearly.

The number of stipends to be awarded shall be as follows :—

(*a*) On the results of the first examination in each year—

Four stipends of Rs. 4 each per mensem.
One stipend of Rs. 3 per mensem.

(*b*) On the results of the second examination in each year—

Two stipends of Rs. 6 each per mensem.
Four stipends of Rs. 5 each per mensem.

When the additional stipend of Rs. 5 per mensem referred to in clause 5 above becomes available, it shall be awardable as if there had been five stipends of Rs. 5 each per mensem provided for on results of the second examination next following.

9. Stipends shall ordinarily be awarded as follows. The marks obtained by the passed candidates from each indigenous *tol* in the said province (preference being given to those *tols* whose candidates are examined before the Calcutta Pandit Sabha) shall be added together. Stipends shall be awarded to those teachers whose *tols* show the highest aggregates of marks, and as between the successful teachers those with the higher aggregates shall ordinarily receive the more valuable stipends for the respective examinations. In the case of a " tie " or equality of marks for two teachers in respect of the last stipend such stipend shall be divided between them. But the Maharaja Tagore or his Chief Manager or failing them the Director of Public Instruction, Bengal (as the case may be) may nevertheless disapprove of any so selected and may finally approve any other teacher from any other *tol* at his discretion. If there be more than one teacher at any of the qualified *tols*, each one shall be eligible for a stipend. If there shall not be sufficient approved teachers at *tols* whose candidates appear before the Calcutta Pandit Sabha, then teachers from other *tols* chosen by the administrator (subject to the approval of the Maharaja Tagore for the time being as aforesaid or in default by the Director of Public Instruction, Bengal, as aforesaid) shall become eligible and be selected in like manner.

10. A teacher may not hold more than one stipend at a time, but if he shall become eligible for two or more stipends he shall ordinarily be given the higher stipend. If any teacher receiving a stipend under this scheme comes into receipt of a Government stipend he shall cease to receive a stipend under this scheme as from the first month in which he receives a Government stipend.

11. If a recipient shall die during the 12 months in which he is to receive a stipend the balance of his stipend (after the month in which his death occurs) shall be accumulated and applied as if it were accumulations of the annual surplus of Rs. 7-8 hereinbefore provided for or at the discretion of the administrator and with the approval of the Maharaja or his Chief Manager or failing them the Director of Public Instruction (as the case may be) in manner aforesaid may be awarded to any meritorious student as undermentioned.

12. In the event of any stipend to teachers as aforesaid not being awarded whether on account of absence of eligible teachers or for any other reason, the moneys so left unawarded may be applied in giving stipends to meritorious passed candidates at the said examinations, preference being given in the first instance to candidates appearing before the Calcutta Pandit Sabha, and in the ordinary course those who obtain most marks shall be considered most meritorious, but selection shall be in the discretion of the administrator, subject to such approval of the Maharaja or his Chief Manager or failing them the Director of Public Instruction as aforesaid.

13. In the event of any case arising regarding the administration of this Endowment which is not provided for by this scheme, the administrator shall take action as may be decided in consultation by him with the Maharaja Tagore for the time being or if he is not available then with the Director of Public Instruction for the time being.

[The Secretary of State is unable to give any undertaking that the Regulations will remain unaltered in the future.]

1. Until further notice the Secretary of State for India in Council will, during each year, make a number of appointments of Assistant Executive Engineers in the Public Works Department in India.

In making these appointments he will act with the advice of a Selection Committee, including at least one eminent representative of the Engineering profession.

In 1928 it is intended that nine* appointments shall be made.

The Selection Committee will probably sit in May.

2. Applications must be made on a printed form, which may be obtained from the Secretary, Services and General Department, India Office, Whitehall, S. W. 1, and should reach the India Office not later than 1st April 1928

The decision of the Secretary of State in Council whether a candidate satisfies these conditions shall be final. A candidate must also be of good moral character and sound bodily health and, in the opinion of the Secretary of State for India in Council, in all respects suitable to hold an appointment in the Indian Public Works Department.

APPENDIX IV.

(*See* paragraph 14 of the Regulations.)

NOTE.—This appendix is merely intended to show the principal leave rules in the Fundamental Rules and the Pension Rules at present applicable to Engineers appointed to the Indian Services from the United Kingdom without going into minute details, and does not profess to deal with every case that may arise The rules are subject to alteration, and any disputed question must be decided with reference to the authorised text of the Fundamental Rules or Civil Service Regulations for the time being.

LEAVE.

(*The following rules apply only to officers of non-Asiatic domicile.*)

1. Leave is calculated in terms of "leave on average pay," and the amount of "leave on average pay" which an officer earns is five-twenty-seconds of the period spent on duty.

2 Subject to certain maxima and minima and to the limitations noted below, an officer may draw, at his option, leave salary equal to the average pay of the last 12 months of completed duty or to half such average pay. All leave on average pay and half the period on half average pay is counted against the leave earned. An officer may take his leave on average pay, on half average pay, or on a combination of the two, provided that his continuous absence from duty does not exceed 28 months, and that the amount of leave taken on average pay does not exceed eight months at any one time. The maximum amount of leave admissible during an officer's career, expressed in terms of leave on average pay, is three years plus one-eleventh of the period spent on

duty, of which not more than one year plus one-eleventh of the period spent on duty may actually consist of leave on average pay. Leave not due and carrying half average pay may be granted on medical certificate, and, within certain limits, for other reasons, but an officer will not again commence to earn leave until the expiration of a fresh period of duty sufficient to earn a credit of leave equal to the leave he has taken before it was due. After 28 months' absence from duty an officer draws quarter average salary, subject to certain maxima and minima.

3. Leave salary is ordinarily payable in rupees if the officer spends his leave in Asia, and in sterling if he spends it elsewhere.

4. It should be noted that leave can never be claimed as of right, but is given or refused at the discretion of Government.

PENSIONS.

5. The following is a summary of the pension rules applicable to Engineers appointed to the Indian Services by the Secretary of State from the United Kingdom.

Ordinary Pensions.

6. Subject to the absolute right, which will not ordinarily be exercised, of the Government of India to decline to permit any officer to retire before reaching the age for superannuation, should it be necessary in the public interest to retain his services, officers will be allowed to retire optionally after twenty or more years' qualifying service.

7. An officer is entitled to superannuation pension on attaining the age of fifty-five years, when retirement is ordinarily required, or on retirement thereafter. (An officer is sometimes, for special reasons, retained after attaining the age of fifty-five years.)

8. The rates of retiring and superannuation pension are $\frac{1}{60}$ths of average emoluments, subject to the following maxima :—

Completed years of qualifying service.	Maximum limit of pension.
	Rs.
20—24	... 4,000 per annum.
25	... 6,000 ,,
26	... 6,200 ,,
27	... 6,400 ,,
28	... 6,600 ,,
29	... 6,800 ,,
30	... 7,000 ,,

9. Government may retire any officer after he has completed 25 years' service without giving reasons, and without any claim for compensation in addition to pension, and in that event the pension admissible to him will ordinarily be regulated on a scale not exceeding that laid down above. Government also reserves the general power to reduce the pension ordinarily admissible in all cases where an officer's service has been unsatisfactory.

10. An officer who is compelled to retire through ill-health not occasioned by irregular or intemperate habits will be eligible for invalid gratuity or pension as follows :—

(*a*) After qualifying service of less than 7 years a gratuity not exceeding one month's emoluments for each completed year of service (except in special cases and under the orders of the Government of India, who may sanction a maximum of 12 months' emoluments). If the emoluments of the officer have been reduced during the last three years of his service, otherwise than as a penalty, average emoluments may, at the discretion of the authority which has power to sanction the gratuity, be substituted for emoluments.

(*b*) After a service of not less than 7 years, a pension not exceeding the following amounts :—

Completed years of qualifying Service.	Scale of Pension.	Maximum.
7	7 sixtieths of average emoluments	2,000 per annum.
8	8 ,, ,,	2,350 ,,

28	30 " "	6,600 "
29	30 " "	6,800 "

Average emoluments are calculated over the last three years of service.

Pensions drawn in this country are converted into sterling at a privileged rate of exchange of 1*s.* 9*d.* the rupee.

Additional Pensions.

11. The Government of India have classified certain high appointments into two grades, the lower comprising those posts which involve high but intermediate responsibility, the higher consisting of those which require a marked degree of independent administrative and professional capacity. DEPARTMENT OF AGRICULTURE, BENGAL.

Final Forecast of the Sugarcane Crop of Bengal, 1927-28.

(NOTE.—On an average of the five years ending 1925-26, the area under sugarcane in Bengal has represented some 7·5 per cent. of the total area under sugarcane in British India.)

Character of the season.—As indicated in the previous forecast, the weather was favourable in the early stages of the crop. But the weak monsoon adversely affected it in parts of West and North Bengal. Elsewhere, the weather proved generally beneficial and a satisfactory crop has been reaped for the province, on the whole.

Acreage.—The total area planted is estimated at 208,900 acres this year as against 200,800 acres last year.

Outturn.—According to the estimates of District Officers, the average outturn of the crop for the province works out at 83 per cent. of the normal this year, as against 80 per cent. last year.

Taking 37 maunds as the normal yield of cane *gur* per acre, the gross outturn for the province is estimated at 235,700 tons this year as against 215,400 tons last year.

Other sources of Gur.—The total quantity of *gur* likely to be obtained from date-palm juice and others is estimated at 96,500 tons this year, as against 107,900 tons last year.

The quantity of *gur* for the province from all sources is thus estimated at 332,200 tons this year as against 323,300 tons last year.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 1st February 1928.

Summary.—During the week the rainfall was generally light and scattered. Preparatory of tillage for jute and other autumn crops is progressing, but more rain is needed for the operation. Threshing of winter paddy, harvesting of early spring crops and cutting and pressing of sugarcane continue under favourable conditions. Prospects of standing crops are generally fair except in parts of West and North Bengal, where the condition continues to be reported as poor. The recent rain has slightly benefited the late spring crops. Distress continues to prevail in parts of Bankura, Dinajpur, Birbhum, Nadia, Murshidabad and Malda. In the latter four districts the number of persons employed on test relief works was 8, 780, 6,655 and 1,200, respectively. The average price of common rice for the province has fallen by about 0·33 per cent. as compared with that of the previous week.
